

Simple > Coin Price by Token Addresses

Simple

Coin Price by Token Addresses

Copy page

This endpoint allows you to **query one or more token prices using their token contract addresses**

GET /simple/token_price/{id}

Coin Price by Token Addresses

cURL

```
curl --request GET \  
  --url 'https://pro-api.coingecko.com/api/v3/simple/token_price/ethereum?contract_addresses=0x2260fac5e5542a773aa44fbcfedf7c193bc2c599' \  
  --header 'x-cg-pro-api-key: <api-key>'
```

200

```
{  
  "0x2260fac5e5542a773aa44fbcfedf7c193bc2c599": {  
    "usd": 67187.3358936566,  
    "usd_market_cap": 1317802988326.25,  
    "usd_24h_vol": 31260929299.5248,  
    "usd_24h_change": 3.63727894677354,  
    "last_updated_at": 1711356300  
  }  
}
```

AI Support

- You may obtain the asset platform and contract address via several ways:
 - Refer to respective coin page and find 'contract address'.
 - Refer to </coins/list> endpoint (`include_platform=true`).
- You may flag to include more data such as market cap, 24hr volume, 24hr change, last updated time, etc.

! Note

- The endpoint returns the global average price of the coin that is aggregated across all active exchanges on CoinGecko.
- You may cross-check the price on [CoinGecko](#) and learn more about our price methodology [here](#).
- Cache / Update Frequency: every 20 seconds for Pro API (Basic, Analyst, Lite, Pro, Enterprise).

Authorizations

apiKeyAuth

x-cg-pro-api-key string header required

Path Parameters

id string default:ethereum required

asset platform's ID

*refers to /asset_platforms .

Example: "ethereum"

Query Parameters

contract_addresses `string` `default:0x2260fac5e5542a773aa44fbcfedf7c193bc2c599` **required**

>
the contract addresses of tokens, comma-separated if querying more than 1 token's contract address

vs_currencies `string` `default:usd` **required**

target currency of coins, comma-separated if querying more than 1 currency.

*refers to /simple/supported_vs_currencies.

include_market_cap `boolean`

include market capitalization, default: false

include_24hr_vol `boolean`

include 24hr volume, default: false

include_24hr_change `boolean`

include 24hr change

default: false

include_last_updated_at `boolean`

include last updated price time in UNIX , default: false

precision `enum<string>`

decimal place for currency price value

Available options: `full` , `0` , `1` , `2` , `3` , `4` , `5` , `6` , `7` , `8` , `9` , `10` , `11` , `12` , `13` , `14` , `15` , `16` , `17` , `18`

price(s) of cryptocurrency

>

usd number

price in USD

usd_market_cap number

market cap in USD

usd_24h_vol number

24hr volume in USD

usd_24h_change number

24hr change in USD
